

TEAMWORK BUILDS RESULTS

*Let SSCI Be Part of
Your Environmental Team*

A strong team that is focused on quality work and innovative but proven methods can build partnerships that produce results on time and within budget. Separation Systems Consultants, Inc. (SSCI), professionals in environmental management and field remediation, is just that kind of team. And we'd like to be part of your team for success.

SSCI knows the environmental industry. This woman-owned business is forty-hour trained, has an excellent safety record, and is insured and bondable.

Fines are expensive, and so is poorly directed or unnecessary work. You need a team in the field that you can rely on.

You want the job done quickly, quietly, efficiently. SSCI understands the problems and limitations encountered in the field. We understand the difficulties you face in reconciling your clients' best interests with federal, state and local government regulations and the ever-changing technologies of environmental services.

*Get exactly the service you need,
when you need it—*

Separation Systems Consultants, Inc. provides a full complement of services. We offer effective programs, designed specifically to your needs.

*"Getting the job done
is priority number one,
not prolonging
our participation.
We're looking out for
the client because
we see that as our job."*

Helen I. Hodges
President of SSCI

The SSCI team capabilities include:

- A team approach to problem solving;
- Extensive successful experience;
- Quick response;
- Flexible, professional service;
- Cost-effective reliability;
- City, state and federal experience;
- Licensed, bonded and insured; and
- **Certified DBE** – Houston, Austin, Dallas, San Antonio, State of Texas, Texas Department of Transportation, METRO and more.

An experienced team—

SSCI has the diversified experience and broad knowledge in traditional methods you need on your environmental team. Our well-trained, reliable team members understand the importance of quality work.

An innovative team—

But SSCI is also an innovator in implementing new technologies and methods where appropriate. Our resume includes bioremediation, thermal treatment and even new designs for the treatment of pesticides and dairy waste. SSCI is your best choice for a partner in finding timely, cost-effective solutions to the entire spectrum of today's environmental challenges.

SSCI's services include:

- Consulting services;
- Site remediation and closures;
- Above ground and underground storage tank removal and assessment;
- Hazardous and nonhazardous materials cleanup and management;
- Permitting;
- Storm water and pollution control;
- Asbestos services;
- Oilfield services;
- Site assessment and screening;
- Nonhazardous oilfield waste pits;
- and more.

SSCI is committed to protecting people and property, and keeping clients in compliance with environmental laws. Put us on your team. Call SSCI today.
