Lab Waste Disposal

It is incumbent upon School Districts, Colleges, Universities and Hospitals to properly inventory, store and dispose of Lab Chemicals in a safe and healthy manner. Non-compliance can result in thousands of dollars in fines and closure of laboratories. SSCI routinely helps Facility Managers segregate, label, manifest and transport hazardous, toxic, corrosive and metal containing chemicals to proper waste disposal facilities.

Waste chemicals are packaged to meet all DOT, state regulatory agencies and disposal facility requirements.

Clients

- School Districts (ISDs)
- Colleges and Universities
- Hospitals
- Medical Centers
- Municipalities
- Laboratories
- Clinics
- Processing Facilities
- Petro Chemical Facilities

An inventory of over 2,800 items is evaluated, characterized and manifested for proper transportation and permitted disposal.

Packaged waste chemicals are segregated, repackaged, labeled, loaded and transported to a permitted disposal facility under uniform hazardous waste manifest.

Over 80% of all K-12 and college laboratory chemicals are found to be hazardous and toxic.
